CAREER OBJECTIVE

I'm a fresh graduate who enjoys learning new things and solving problems creatively. Through real projects and an internship in IT operations, I've learned to manage tasks, work with different teams, and stay organized under pressure. I'm looking for a place where I can grow, take on new challenges, and add value to the organization.

EXPERIENCE

IT Operations Intern – *Office of IT, Southeast University* *March, 2026 - June, 2026*

Assisted in managing campus IT operations, network infrastructure, and system administration. Provided technical troubleshooting and maintenance to ensure smooth & secure services.

EDUCATION

Southeast University – *Dhaka, Bangladesh* *2022 - 2026*

Bachelor of Science in **Computer Science & Engineering**
CGPA is 3.59 out of 4.00

Wisdom Standard College – *Rajshahi, Bangladesh* *2018 - 2020*

Higher Secondary Certificate – **Science**
GPA is 5.00 out of 5.00

Hamirkutsha High School – *Rajshahi, Bangladesh* *2016 - 2018*

Secondary School Certificate – **Science**
GPA is 5.00 out of 5.00

SKILLS

- **Languages** C, C++, JavaScript.
- **Technologies** HTML5, CSS3, React.js, Node.js.
- **Frameworks** Tailwind CSS, Next.js, Express.js.
- **Database** MySQL, MongoDB.
- **Tools** Version Control → Git, GitHub.
IDEs → CodeBlocks, VS Code, Kiro, Antigravity.
Technical → Microsoft Office Suite (Word, Excel, PowerPoint).
- **Hosting** InfinityFree, Railway, Vercel, Netlify, Render.

PROJECTS

01. KitchenHood (HTML, Tailwind CSS, JavaScript, Node.js, MongoDB) | [Live Link](#)

KitchenHood is an all-in-one platform that makes it easy for customers to buy kitchen appliances and book repair services in one place. It features a complete shopping cart, a smooth checkout process, and real-time live chat for instant customer support. Behind the scenes, a secure admin dashboard makes it simple for business owners to track orders, manage inventory, and respond to customers efficiently.

02. Textile Planning Solution (HTML, Tailwind CSS, JavaScript, Node.js, MongoDB) | [Live Link](#)

Developed a Textile Planning for Epyllion Textile featuring a comprehensive management dashboard to track daily production stages, including Knitting, Dyeing, and Delivery. Engineered an automated workflow system where a single Excel upload instantly sorts and routes relevant data to respective departments, enabling precise tracking of production dates, monthly department order loads, and plan VS actual OTD calculations. Implemented strict role-based security restricting account creation to administrators, and integrated dynamic reporting features that allow teams to export fully updated factory workflow data as PDF and Excel files on demand.

03. MediCare Connect (HTML, Tailwind CSS, Next.js, Node.js, Express.js, MongoDB, Stripe) | [Live Link](#)

Developed a full-stack doctor appointment and telemedicine management platform designed to streamline patient consultations and clinical workflows. Implemented multi-role authentication (Patient, Doctor, Admin) with Google OAuth and JWT, doctor search and specialty-based filtering, and real-time appointment booking integrated with Stripe card payments. Engineered responsive role-based dashboards featuring dynamic prescription generation, patient review systems, and administrative analytics with interactive charts to ensure a secure, scalable healthcare experience.

04. Cara E-commerce Fashion Shop (HTML, CSS, JS) | [Live Link](#)

Developed a fully responsive fashion e-commerce website using HTML, CSS, and JavaScript. I built this project to strengthen my core frontend skills, which gave me the perfect opportunity to learn how media queries work for mobile responsiveness. I also implemented a custom hamburger menu for smaller screens, and designed static layouts for product listings and a shopping cart to showcase a complete e-commerce interface.

VOLUNTEER EXPERIENCE

Sub-Executive – IEEE Computer Society Student Branch Chapter	2025 - 2026
Logistics Team Member – Bangladesh Mathematical Olympiad	2024 - 2026

LANGUAGE COMPETENCIES

Mother tongue—Bengali; Basic proficiency in English.
